Waterproofing System

Ultraseal bridge preservation waterproofing system.

Ultraseal Waterproofing System is a built up multilayer system used to protect the pavement surface from chlorides, water penetration and other harmful materials.

TechCrete

TechCrete, the flexible concrete repair solution for bridge rehabilitation.

Crafco TechCrete is the long-term solution for distressed concrete pavement preservation. Due to its flexibility, high tensile strength, ability to bridge joints and high compressive resistance, TechCrete creates a long lasting concrete repair. Once in place Crafco TechCrete will conform to the pavement movement and will not de-bond or crack. Repairs with Crafco TechCrete can be opened up to traffic within as little as one hour.

Matrix Bridge Joint

Asphaltic Plug Bridge Joint System

Crafco Matrix Asphaltic Plug Bridge Joint System is a pre-measured, pre-packaged hot-applied bridge expansion joint system primarily composed of uniquely formulated polymer modified asphalt binder combined in one box with the exact ratio of select aggregate. The Crafco Asphaltic Plug Bridge Joint System can be used for expansion, fixed end, and pressure relief joints, in both new construction or rehabilitation projects. Joints are low cost, quick, and easy to install and maintain.
